Ziyue Ge (葛子越)

(+86)155-5533-3869 · geziyue23@stu.pku.edu.cn

I am currently a student in the 2023 cohort of Turing Class, an honors program in computer science at Peking University (PKU).

I have a basic background in logic, philosophy, and anthropology, and enjoy exploring questions in these fields, especially those in Science and Technology Studies (STS) related to contemporary technology.

I have broad interests across computer science and its intersections with other disciplines.

EDUCATION

Sep 2023 – Jun 2027 (expected)

Peking University · School of Electronics Engineering and Computer Science (EECS) · Computer Science (Turing Class)

and

Peking University · Department of Philosophy · Logic (Dual Degree)

GPA: 3.74 / 4.0 · Rank: top 25%

Major GPA: 3.81 / 4.0

WORK EXPERIENCE

Jun 2025 – Oct 2025

MiniMax · LLM Research Intern

In the pretraining team, I gained experience in distributed data processing, including basic data processing with Ray, pretraining data formats, and the overall pretraining workflow.

Under my mentor's guidance, I explored synthesizing long-form text from Wikipedia for continued pretraining (CPT).

I was then honored to work under the guidance of Prof. Wenhu Chen on a research project in data synthesis for agentic search. Through this project, I gained experience building a minimal agent harness, using LLM-as-judge evaluation, and processing data for post-training.

Jun 2026 – present

BioGeometry · AI for Science (AI4S) Research Intern

During this internship, I have independently pursued an exploratory project on a model for protein sequence and structure co-design, working on model development, evaluation, and training monitoring.

I have also contributed to code review, model evaluation, and training monitoring for Geoflow-design, a next-generation protein design model.

HONORS AND AWARDS

John Hopcroft Scholarship (Turing Class) 2026, 2025, 2024

The 2024 ICPC Asia Hong Kong Regional Contest **Gold Medal (1st place)** December 2024

The 2024 ICPC Asia Kunming Regional Contest **Gold Medal (4th place)** December 2024

Chinese National Olympiad in Informatics (NOI) **Gold Medal** August 2022

TEACHING EXPERIENCE

Fall 2025

Peking University · Teaching Assistant

I served as a teaching assistant for *Introduction to Computer Systems*, a course covering the fundamentals of computer systems for all sophomore CS students. I organized and taught small-group discussion sessions, proctored exams, and graded exam papers.

Fall 2026

Peking University · Teaching Assistant

I serve as a teaching assistant for *Discrete Mathematics and Structures (I)*, an advanced section for sophomores with a strong mathematical background. I grade assignments and write exam questions.

PUBLIC TALKS

Sep 2026
798, Beijing

At the invitation of inter.act, a space for art and everyday practice, I joined two friends in giving a public talk titled "Where Are We Now? AI Today and the Future of Humanity" in Beijing's 798 Art District. We introduced the basic principles of large language models and shared our observations and reflections with the general public (prolétariat), across different ages and backgrounds.

PROFESSIONAL SKILLS

I am proficient in C/C++, Rust, Python, and Haskell.

I am familiar with Linux and have some experience in systems programming. I implemented a simple OS kernel in Rust for my operating systems course.

I am familiar with development tools such as Git and Docker and have experience working on software projects in a team.

I have studied programming languages through courses on the foundations of software science and program analysis. I am familiar with the overall framework of formal verification and have a basic grounding in logic.

I have experience conducting deep learning research and development independently and am proficient in tools such as NumPy and PyTorch.

LANGUAGE SKILLS

I have good English communication skills, with a CET-6 score of 560.

I am also a beginner in Japanese and currently study it on Duolingo.
